PROFILE

Junior developer specialising in C# and .NET, with training in Multiplatform Application Development.
Passionate about backend programming and working with relational databases.
Hands-on experience in scripting, REST API development, and SQL database management.
I consider myself a committed individual, eager to learn, contribute value to the team and continue growing in the software development sector.

MARÍA LOZANO LEDESMA

PROFESSIONAL EXPERIENCE

Technology Assistant
KPMG | Zaragoza | 2022 - 2024

I began my career at KPMG through a dual training programme and continued working there as a Technology Assistant after completing it. I took part in various technical projects related to process automation, script development using APIs, and the management of accounts and critical systems using specialised tools.
This experience allowed me to apply development best practices, work in complex environments, and collaborate within a multidisciplinary technical team.

EDUCATIONAL BACKGROUND

Higher Technician in Multiplatform Application Development
Colegio Ntra. Sra. del Pilar Salesianos | Zaragoza | 2021 - 2023
